

Amin Karmali (CEO) has a B.Sc. (Honours) degree and a PhD in Biochemistry (Enzymology) from King's College London (U.K.), post-doctorate in Immunochemistry at the Gulbenkian Institute of Science (Lisbon-Portugal) and Aggregation in Enzyme Technology at the University of Évora. He was Full Professor in the Department of Chemical Engineering at ISEL and lectured several course units such as Advanced Biotechnology, Biofuels, Functional Genomics and Bioinformatics and Biotechnology in Health. He was President of the Research Center in Chemical Engineering and Biotechnology (CIEQB) at ISEL, Coordinator of the Master's Degree in Analysis and Control of Environmental Risks in Health (MACRAS), Director of Research Projects at the ex-INETI, Visiting Professor at the University of Évora and Visiting Scientist at King's College London (Department of Biochemistry and Molecular Biology), Principal Investigator of several national and international projects in Biotechnology, Scientific Consultant for several biotechnology and bioengineering companies and he is an Integrated Member of CITAB-UTAD. He is involved in R & D activities in biosensor technology, enzymes, monoclonal antibodies, biocatalysis, electronic cigarettes, medicinal plants and mushrooms, cannabis and bioeconomy. He is the author and co-author of about 90 research papers in international journals on the web of science, several National and European patents, over one hundred abstracts at national and international conferences with proceedings and about 200 oral presentations as well as posters. He has supervised several master's and Ph.D theses and is a referee and member of the editorial board of several international journals.
